Summary

Software Engineer with **3 years and 2 months of experience** building scalable cross-platform mobile applications using **React Native and TypeScript**. Specialized in real-time systems, performance optimization, state management, and React Native New Architecture (**Fabric & TurboModules**). Proven track record of delivering production-grade applications, optimizing application performance, and building reliable mobile experiences across **Android and iOS**.

Technical Skills

Mobile Development: React Native, Android SDK
Frontend: React.js, JavaScript (ES6+), TypeScript, HTML5, CSS3
State Management: Redux, Redux-Saga, Redux Toolkit, RTK Query
Backend & APIs: Node.js, Express.js, REST APIs, WebSocket (Socket.io)
Databases: MongoDB, Firebase Realtime Database
Cloud & Services: Google Firebase (FCM, OTP Authentication, Realtime Tracking)
DevOps & CI/CD: GitHub Actions, Fastlane
Version Control: Git, Git Flow
Methodologies: Agile Scrum, UI/UX Collaboration (Figma, Low/High-Fidelity Design Handoff)
Tools: Reactotron, Postman, VS Code

Experience

Application Developer

Divum Corporate Services Private Limited

July 2023 – Present

Bengaluru, Karnataka

- Developed and maintained scalable cross-platform mobile applications using **React Native, TypeScript, JavaScript, Redux, and RTK Query** for **Android and iOS**, delivering responsive and maintainable user experiences.
- Built reusable and responsive mobile UI components following **React Native best practices**, collaborating with UI/UX and backend teams to deliver consistent cross-platform experiences.
- Integrated and maintained **REST APIs** using **RTK Query, Axios, and Postman**, implementing efficient server-state management, caching, and API data synchronization while reducing redundant network requests by **40%**.
- Enhanced rendering performance by **25%** by adopting **React Native New Architecture (Fabric and TurboModules)**, reducing bridge overhead and improving UI responsiveness.
- Built custom **Native Android modules using Kotlin** and integrated platform-specific functionality, including critical notifications in **Silent and Do Not Disturb (DND)** modes.
- Developed real-time application flows using **Socket.IO and Redux-Saga**, implementing asynchronous data handling and improving reliability across network conditions.
- Automated mobile build and release pipelines using **GitHub Actions and Fastlane**, supporting consistent production deployments and reducing deployment time by **30%**.

Projects

Club Mahindra | React Native, TypeScript, Redux, Axios, New Architecture, Realm, Jest

- Developed a cross-platform holiday booking application delivering seamless UX across **Android and iOS**.
- Improved performance and startup time by adopting **React Native New Architecture (Fabric + TurboModules)**.
- Migrated legacy components to **New Architecture-compatible modules**, improving bridge efficiency and type safety.
- Implemented **unit test cases using Jest** for reusable components, utility functions, and application logic to improve reliability and maintainability.
- Managed production releases on **Google Play Store and Apple App Store** with version control and build pipelines.

Convo – Real-Time Chat Application | React Native, Socket.IO, Node.js, MongoDB, TypeScript, Redux-Saga, Jest

- Built a full-stack real-time chat application supporting messaging, typing indicators, read receipts, and live presence using **React Native and Socket.IO**.

- Reduced message latency by **35%** through optimized event handling and efficient state synchronization.
- Secured REST APIs and socket connections using **JWT authentication**, ensuring safe real-time communication.
- Designed scalable architecture using **Redux-Saga** for message queuing, background sync, and reconnection handling.
- Implemented **Jest unit tests** covering chat components, message handling, state management, and utility functions to improve application stability.
- Automated Android and iOS builds and deployments using **Fastlane CI/CD pipelines**.

Gintaa Delivery Partner App | *React Native, Kotlin, Firebase, REST API, Jest*

- Developed a cross-platform delivery application handling **order assignment, tracking, and end-to-end delivery workflows** across Android and iOS.
- Integrated **REST APIs and Firebase services** for order management, real-time updates, and delivery workflows, ensuring reliable application data synchronization.
- Implemented **real-time GPS tracking** using Firebase, enabling live delivery monitoring and improving operational visibility.
- Engineered performance-critical features at the **native Android layer using Kotlin**, improving application responsiveness and platform-specific functionality.
- Built a custom **Native Android module** to trigger notifications in **Silent and DND modes**, ensuring critical order alerts were delivered reliably.
- Integrated **Firebase Cloud Messaging (FCM)** for real-time order notifications and implemented **Jest unit tests** for key application logic and reusable components.

ABG Connect (Web + Mobile) | *React Native, React, TypeScript, Redux-Saga, Firebase, Notifee, Jest*

- Built and maintained a **React.js web dashboard and React Native mobile application** for employees to browse, book, and manage internal events.
- Implemented secure **SSO authentication** and integrated backend APIs to provide seamless and reliable access across internal systems.
- Developed a **reusable component library**, reducing development effort by **30%** and improving UI consistency across the application.
- Optimized application state and asynchronous data flows using **Redux-Saga**, reducing redundant API calls and improving overall performance.
- Integrated **Firebase push notifications and Notifee** for real-time user engagement and timely application updates.
- Implemented **Jest unit tests** for reusable components, utility functions, and application logic to improve code reliability and maintainability.

Education

Bannari Amman Institute of Technology

Bachelor of Technology in Computer Technology (CGPA: 8.74 / 10.00)

May 2024

Erode, TamilNadu
